

Public Notice

Municipality: City of Elizabeth
Printed On: September 14, 2020

Public Notice:

PUBLIC NOTICE The City of Elizabeth is updating its jurisdictional Hazard Mitigation Plan – Natural Hazards that complies with the Federal Disaster Mitigation Act of 2000 (DMA 2000). The Hazard Mitigation Plan – Natural Hazards provides the framework for state and local governments to evaluate and mitigate natural hazards as a condition of receiving Federal disaster assistance. The Hazard Mitigation Plan – Natural Hazards identifies and prioritizes the likelihood of damage to life and property from natural disasters and develops a strategic plan to minimize identified risks. As part of the process, the City intended to host public meetings to obtain public input on potential natural hazards; however due to the current COVID-19 restrictions, this second public presentation is being provided as a slide show and video presentation. The presentation slides and video can be found on the City of Elizabeth website on the Engineering Page under the Hazard Mitigation tab. The link is as follows:

<https://www.elizabethnj.org/444/Hazard-Mitigation>

The materials are available for review and comment. The City is seeking public input on potential natural hazards which may threaten the community as well as to identify potential mitigation measures that would minimize the impact/effect of such hazards. The City will also be seeking information on the impact of past disasters in your community.

All questions, comments or suggestions should be directed to the City of Elizabeth, Division of Engineering, City Engineer Daniel Loomis, at dloomis@elizabethnj.org or 908-820-4270.
